CCV Mobile A960

Ideal for mobile use

Thanks to support for ZVT and OPI, integrating the Android POS terminal into the retailer's checkout environment is similar to integrating conventional POS terminals.
With epay network operation, girocard and all major credit cards can be accepted. Thanks to the encapsulated Android operating system, a wide range of merchant or value-added service apps can be loaded onto an Android POS terminal alongside the payment application.

This means that a single device can handle various use cases, thereby eliminating the need for additional hardware.

- PCI PTS 6.x, TA 7.2 and DC POS 3.0 certifications
- Android OS: open to various merchant apps
- Camera: front and rear cameras for processing QR payment methods
- Communication: WiFi 2.4GHz + 5GHz; Bluetooth, 4G module
- Versatile for mobile and local use
- Contactless payment with all cards, smartphones and smartwatches

Performance

With the powerful Spreadtrum 8-core Cortex-A55, the Mobile A960 delivers the performance required in every payment situation, ensuring smooth transactions with short transaction times.
